PLAN "B" EYEWEAR

Keep it bold for the year of vision with the latest from Glacée by Plan "B" Eyewear.

This avant-garde release plays with big, bold shapes, taking cat-eyes and rounds to their next logical extreme.

The colours stay bright, fun and wearable, with deep reds, rose golds, blues and purples all making an appearance.

Double brow bars stay extremely relevant and accoutrements on the frame front add an extra depth of style. Press patterns and texture also play a part in bringing the look and style of these statement pieces together.

RYE&LYE

Ribolla is one of the new Rye&Lye styles for winter 2020.

This model, which is also available in sunglasses, boasts unmistakably unique styling. In this case, the lens is framed by a singular butterfly-shaped metal profile that converges with a luxurious acetate top rim, giving rise to a magical interplay of shapes.

The Rye&Lye brand by Imagine98 features frames made of high-calibre materials with aesthetically-inspired designs.
